Configuring Horizon for use with HP Anyware PCoIP Ultra Performance Professional Service

This Professional Service will assist you in integrating HP Anyware PCoIP Ultra into a Horizon environment. It covers installation of the HP Anyware components and necessary settings within a Horizon environment.

This integration enables Horizon to manage and broker HP Anyware connections, allowing Horizon users to leverage world-class performance with HP Anyware PCoIP Ultra.

It will simplify provisioning and image management by leveraging the Horizon Console as a single management plane for both productivity and high-performance users.

PCoIP Ultra provides high frame rates, 4k resolution, lossless image quality, bit-exact color and GPU-acceleration to users running high-performance workloads.

At the end of the Horizon with PCoIP Ultra Professional Service, you will have a functional environment installed and configured with the assistance and advice of a PCoIP and Horizon expert.
